

Folie 2 (Last queries):

--- how many actor names belong to more than one actor?

In other words:

How many names exist, that at least two actors have?

e.g.:

Marcel, Simon, Simon, Simon = 1

--- how many actors have the name of another actor?

In other words:

How many people exist, where that is the case?

e.g.:

Marcel, Simon, Simon, Simon = 3

First Step, find a subquerie:

```
select name, count(distinct personid) cnt from persons
natural join actors2movies group by name having cnt > 1
order by cnt limit 20;
```
